

## "The Secrets of Empress Teta"

**Personal log: APP Lem**

**Mission: Koros Major recon**

### **Mission Day I**

I arrived today in YT handled by one of the best Dark Brotherhood pilots. I said goodbye to my fellow team mates and ventured forth. Weather was great, perfect for scouting surrounding area. Rocky terrain provided me lots of cover so I wouldn't be detected by enemies and it also provided me shelter from animals. I passed through several canyons today and found no life form yet...apart from some small mammals. I am attaching the explored map to this audio record.

### **Mission Day II**

Seems like Dark Force blessed me with yet another great day for scouting. It was a bit windy though, but nothing special. I explored the surrounding area all the way to the Cinnagar. Again I encountered only small mammals and few plants. Not a very friendly environment for life I suppose. Night is cold and I'm lucky to have my scout armour with internal heating/cooling. Yet again I'm attaching explored map.

### **Mission Day III**

Weather today was the worst since I arrived. Strong winds kept blocking my sight and goggles were almost useless as well. I had to go from rock to rock in order to avoid strong wind blows. I could see Cinnagar in the distance. Its city walls were huge and almost intact. I couldn't get any nearer because of the strong winds. I will have to wait for tomorrow. I found a huge cave where I will spend the night. Wind outside is raging and I hope no other animals sought shelter in the same cave as me. I wasn't able to explore much, but what I could I am attaching.

### **Mission Day IV**

I haven't slept all night. I was watching out for any animals inside the cave. I'm extremely tired, however I will not let the Brotherhood down. Winds weren't that strong today so I got to the Cinnagar with no problem. The big entrance door were opened so I just walked in. City was completely empty. One thing I noticed are the trees. They were growing inside city walls. There was also grass on the ground. Maybe this is enough to support life? I explored a good part of the city and found the best place to sleep overnight. It's above the ground level and is closed. This way I won't have to worry about animals. City walls are protection enough from winds. I am attaching city map...well, at least part I explored.

### **Mission Day V**

Through whole night I heard some racket on city plaza, however, every time I glanced in that direction, nothing was there. Maybe winds were playing tricks on me again...Today I explored rest of the city. My team mates will surely be satisfied with my findings. I found throne room, some operational weapon placements and source of water. I have enough rations to last me at least ten more days. I will stay overnight and go to rendezvous point tomorrow. I am attaching the rest of the city map to audio recording.

### **Mission Day VI**

I'm positive something was making the racket again overnight. I even saw some shadows moving but I couldn't figure out what it is! Strong winds were blowing throughout the whole night and continued in the morning. I was forced to stay within the city walls. I decided to stay awake tonight and try to see what was going on during the night. Nothing to attach today.

### **Mission Day VII**

I stayed up all night long watching the plaza. I swear I could see shadows without their owners. I was terrified with my founding. In the morning I exited the city as soon as I could and traveled as fast as I could. I reached the huge cave I have already been in. I decided to take shelter there and spend the night. At least I'm away from that cursed city.

### **Mission Day VIII**

The shadows! They followed me! I could see them in cave. They are afraid of light and wouldn't come any closer to my fire. As the sun came back again they dissapeared. Again I traveled as fast as I could. Now I'm only one day away from randevouzs point. I just have to spend overnight. I hope the shadows didn't come here.

### **Mission Day VIII (2)**

Shadows are here again. They seem to be moving the rocks from the cave. Wind started getting in! I'm going to try and make them go away with fire. \*sound of footsteps and waving with torch\*  
Fire is almost gone. All I have left is the torch. I'm going deeper in the cave to get more shelter from the wind. I hope this torch will see me through night. \*again sound of waving the torch and a scream\*

### **END OF FILE (EOF)**

Few days later the rescue party found this log, but body and equipment were nowhere to be found.
